

S281 S282 S160L

Il design e il calore sono i veri protagonisti delle sedie in legno. Forme sinuose si alternano a linee pulite per adattarsi ad ogni tipo di arredamento di interni. Le scocche sono prodotte principalmente in multistrato di faggio. A richiesta è possibile rifinirle in varie versioni: verniciate, tinte, laccate, in laminato, con precomposti e rivestite in pelle o rigenerato.

The design and warm effect are the main features of the wooden chair. Curved forms alternate with clean-cut lines to adapt to all types of interior furnishing schemes. The shells are produced mainly in plywood beech. On request they can be finished in various versions: painted, dyed, lacquered, in laminate, with high quality rotary veneer or upholstered in leather or bonded leather.
