Acciaio cromato
Chromium plated

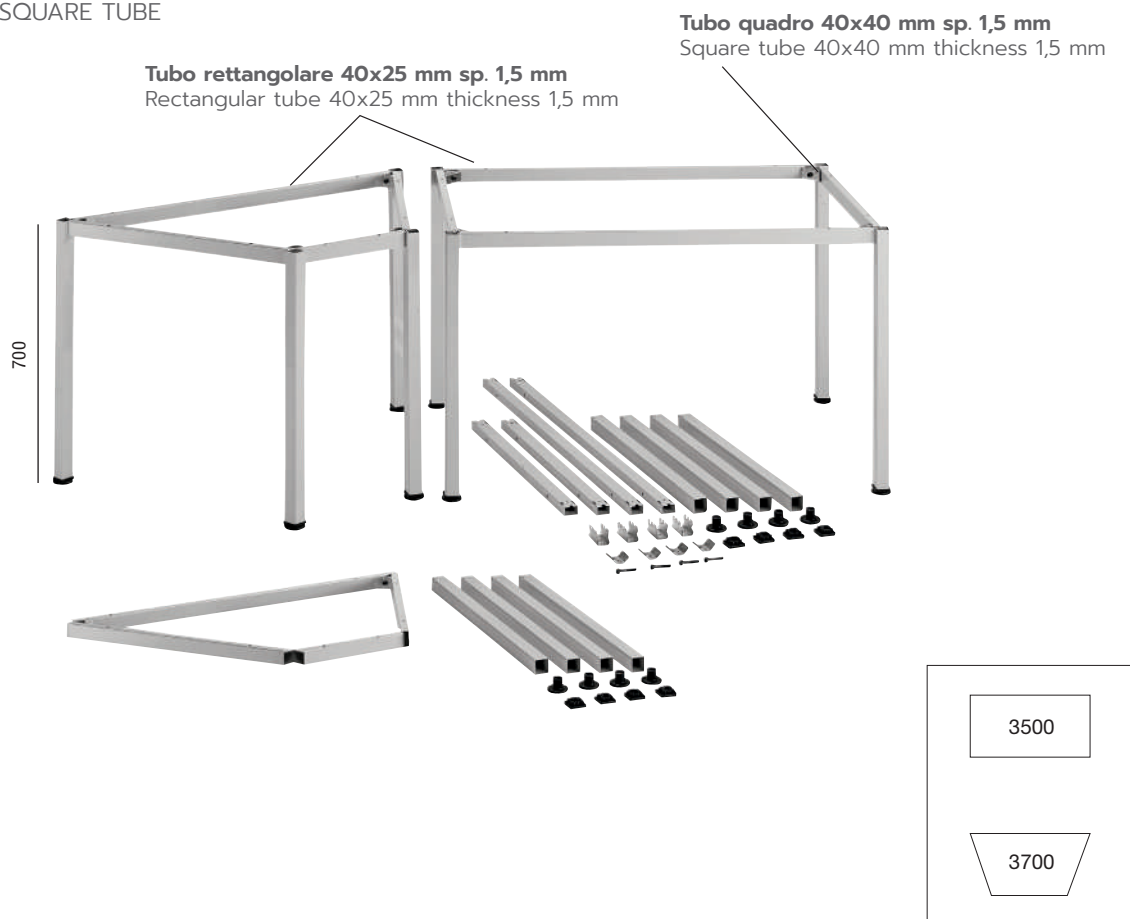

I telai per tavoli sono in metallo verniciato con polveri epossidiche disponibili nelle finiture verniciata colore alluminio goffrato, cromata, bianca o nera. La loro versatilità sta nel fatto che si possono montare con estrema facilità e che si prestano ad aggregazioni complesse grazie alle diverse forme disponibili.

The table frames are made of epoxy powder-coated metal available in embossed aluminium, chromium-plated, white or black painted finishes. Their versatility lies in the fact that they are easy to assemble and lend themselves to complex combinations thanks to the different shapes available.
