armchair / fauteuil

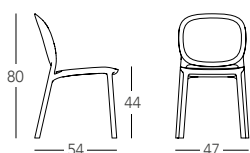

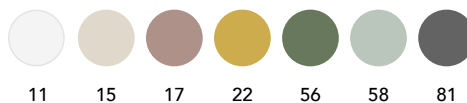

Per HUG si sceglie un materiale certificato rigenerato post consumo industriale PCR. Sedia e poltrona raggiungono un livello qualitativo ed etico superiore, dando vita a una collezione creativamente green adatta sia all'indoor che all'outdoor. Per HUG è stato pensato un elemento estremamente caratterizzante: tra seduta e schienale, dalle forme arrotondate e in equilibrio, i designer hanno introdotto un elemento a fascia, definito da un motivo a righe in rilievo all-over e avvolgente proprio come un abbraccio.

HUG is made with a certified regenerated Post-Consumer Recycled (PCR) material. Chair and armchair reach a higher ethical level and higher quality, giving life to a creatively green collection suitable for both indoor and outdoor environments. HUG features an extremely distinctive element: between the seat and the backrest the designers introduced a band-like element with a rounded and balanced shape, defined by a relieved striped pattern, that envelops just like a hug.

Pour HUG, on choisit le technopolymère certifié régénéré post consommation industrielle PCR. Chaise et fauteuil atteignent un niveau de qualité et d'éthique supérieur, en donnant vie à une collection créativement écologique, approprié aussi bien pour l'intérieur comme l'extérieur. Pour HUG, un élément extrêmement distinctif a été pensé : entre l'assise et le dossier, aux formes arrondies et en équilibre, les designers ont introduit un élément à bande, défini par un motif à rayures en relief sur toute la longueur, enveloppant comme une accolade.

HUG è tecnicamente una monococca, ma in realtà si tratta di un sistema flessibile in cui i componenti si combinano tra loro per creare diverse configurazioni di sedia e poltroncina. Nato per l'outdoor si adatta anche agli spazi interni, con la possibilità di rivestire alcune sue parti con il tessuto.

HUG is technically a monocoque, but it is actually a flexible system in which the components combine to create different chair and armchair configurations. Designed for the outdoors, it also fits well in interior spaces, with the possibility of covering some of its parts with fabric.

HUG est techniquement une monocoque, mais en réalité c'est un système flexible dans lequel les composants se combinent entre eux pour créer différentes configurations de chaises et de fauteuils. Né pour l'extérieur, il s'adapte également aux espaces intérieurs, avec la possibilité de tapisser de tissu certaines parties.
